ing Humira may get serious  
ding:

helps people with certain  
es. It does this by blocking  
e system. However, this part  
m also helps fight infection. This  
ake your child more likely to get  
ny infection that your child may  
udes infections such as colds  
tions like tuberculosis.

Some people have developed  
worsening of heart failure they

and takes Humira, the risk of getting  
er may increase.

*Problems* – Some people have  
worsening nervous system problems  
cludes multiple sclerosis.

*Humira package leaflet for more*  
are not all of the possible side  
ur during treatment with Humira.

Call your child's doctor or get medical care  
right away if your child has any of the following  
symptoms of these possible serious side effects:

*Infections:* Fever, chills, unusual sweating, feeling  
unwell or more tired than normal, feeling or being sick  
(such as nausea or vomiting), diarrhea, stomach pain,  
loss of appetite or weight loss, cough or coughing up  
blood or mucus, shortness of breath, problems urinating,  
skin sores, wounds, muscle aches, dental problems

*Heart failure:* Shortness of breath, swelling of your  
child's ankles or feet, sudden weight gain

*Cancer:* Night sweats; swelling of the lymph nodes  
(swollen glands) in the neck, armpits, groin or other  
areas; weight loss; new skin lesions or change in skin  
lesions (such as moles or freckles) your child already  
has; severe itchiness that cannot be explained

*Nervous system problems:* Numbness or tingling,  
vision changes, muscle weakness, unexplained dizziness

*Tell your child's doctor about any unusual symptoms  
that he or she may have during treatment with  
Humira. These are not all of the possible symptoms  
of these side effects.*

Notes (comments/questions for your child's doctor)
