Details of discovery:	
The 26 th of March the Dutch Health Care Inspectorate received intelligence about Dutch website who are being abused for the selling of illegal pharmaceuticals. This information is shared with the national Financial cyber team. After an investigation they concluded the Dutch websites are hacked due to non-updated plug-ins on the Wordpress websites. Besides this they also found out that the Wordpress software was not up-to date. The websites are guiding visitors to world-pharmacy.org and mainpharmacy.org.	

The illegal medicine sellers created subdirectories on each of the hacked websites.
Technically it is not possible for the Financial cyber team to shut down the hacked websites, so they choose to call the host or owner and urge them to take that part of the website down or take down the complete website.
In total it involves 71 infected websites all over the world.
Some products offered on the websites are COVID-19 related, but also products in relation to erectile dysfunction and others.
A report has been made of the investigation, for this moment only in Dutch. If one needs more information or wants to share information about this case, please do contact me by e-mail.
It is not known since when these websites are hacked.
